

Saw Tipping

Introducing Stellite™ 13 Cobalt Alloy Saw Tips

Engineered for improved ductility (23% increase) results in sharper saws and reduces unscheduled saw changes

- Increased feed speeds and production rates
- Reduction in Kerf
- Improved sawing deviation
- Reduced benching time and effort
- Superior chip resistance vs Alloy12 in dirty wood
- Reduced grinding time vs Alloy 12 (point up)
- Improved wear resistance vs Alloy 12 resulting in longer run time before re-sharpening

Stellite 13 will be packaged with a new label to distinguish it from other cobalt alloys.
